

Are you a tradesman?

Penn State Milton S. Hershey Medical Center researchers are studying the functional effects of welding. Information gained may help protect future welders. This is an independent study sponsored by the National Institutes of Health, with no affiliation to any private entities such as law firms.

Who may volunteer?

- Plumbers, electricians, carpenters, roofers, artisans, construction workers etc.

What will happen in this study?

- Complete questionnaires
- Undergo clinical tests (blood draw, saliva collection, physical examination, memory tests) at study start and again after one year
- Undergo MRI scan at study start and again after one year

Travel and associated costs to participate are covered, and additional compensation will be provided to participants.
